## Letter of Appreciation

Date: 04.06.2014

### To whom it may concern

We would like to recognise the efforts of the subcontractor to Pipeline Integrity. Rio Tinto acknowledges the professional design engineering service provided by Sustech Engineering.

We are thankful to Sustech Engineering, subcontractor to Pipeline Integrity, for the prompt and efficient service they provided to us in the hours of emergency during our maintenance shutdown work of GTG rotor at Paraburadoo.

They have attended site and designed & analysed the temporary structure for GTG rotor maintenance at very short notice.

Their quality of work is very high and thorough. Their engineers are knowledgeable, professional, experienced and delivery focussed.
