About Us

SUSTECH ENGINEERING PTY LTD is a multidisciplinary consulting engineering and project management company providing engineering and technical services of highest professional standard to the industry since 2013 with a strong focus on safety, sustainability, innovation, timely delivery. We use our knowledge to create longer lasting value through experienced professional service and efficient risk management.

We have built HOURGLAZ for ourselves to manage our business and do project management. It has run for us well and now we are offering fruits of our experience and innovation to other sincere businesses like ourselves needing an enterprise software.

You can visit our LinkedIn page <https://www.linkedin.com/company/sustech-engineering-solutions/> and website <https://www.sustech.net.au/> for more extensive projects list

What Can Hourglaz Do for You?

Hourglaz is an application designed to streamline management and operations. If you have employees, projects, and clients: Hourglaz is dedicated to making your day easier.

Instead of having to maintain and use different tools for each individual administrator within the company Hourglaz brings them all into one system, and enables seamless communication between managers, administrators, and employees in an instant.

Hourglaz has been designed to be modular. Each package is designed to function independently, but each module connects to, and informs each other module – increasing the features, functions, and effectiveness of the application.

The available modules are:

✓ Business Development	✓ Quotes & Estimates
✓ Timesheets	✓ Payroll, Invoices & Account
✓ Project Management	✓ Procurement
✓ Human Resources	✓ Recruitment
✓ ANALYTICS for TOP MANAGEMENT's VISIBILITY	

Application Capacity & Distribution Model

Hourglaz has been developed with the aim of supporting up to 250 users within each organization.

Its designed for web-based deployment – using a Software as Service model – allows us to provide access & support markets in almost any part of the world.

Benefits You Get

Business Operations:

- ✓ **Clarity in the Business Process** – Hourglaz has been developed to give a full understanding of the business, both in operation, and in results. Fast, targeted tools allow everyone to understand where they fit in, what tasks need their attention, and who will be waiting on their results.
- ✓ **Integrated Business Architecture** –The specific combination of management roles can be different from business to business, but the task natures stay the same. Hourglaz has been developed so you can allocate responsibilities to match your business needs, and still enjoy the benefits of automatic assistance.
- ✓ **Auditability** – Hourglaz keeps detailed records of the links between modules. Financial audits and project histories can be produced in an instant.
- ✓ **Single point data entry** – To cut down on data entry time and conflicting data, creating inter-department reports, and time spent in meetings to explain both, Hourglaz brings everything into one application – allowing instant communication, reporting, and reconciliation across the entire organization.
- ✓ **Data ownership** – Hourglaz lets you protect your data by handing it to people who know what they are doing. The ability to access and edit data can be delegated selectively across the entire platform.
- ✓ **Real Time Reporting** – Having all your information in one system isn't very useful if it can't be accessed when it's needed. Hourglaz gives you real time reports so decisions can be made quickly, and assisted by the most up to date data possible.
- ✓ **Guided self-management** – From submitting timesheets to monitoring project health, Hourglaz has notification systems to alert users when tasks need their attention. By focusing each employee on their specific tasks, Hourglaz helps managers track progress and inform entire teams of goals and deadlines.
- ✓ **Efficiency** – By automating every basic clerical activity we can, Hourglaz reduces the costs of running a business. The effects of the smartness of HOURGLAZ can be seen from drafting invoices, compiling payroll, or generating reports.

How We Fit In

Your systems, your way

Hourglaz is designed with the flexibility to accommodate your existing accounting infrastructure. We have already integrated with several existing accounting software packages, and we continue to add new API integration options.
